

Reporting Foreign Visitors in CROWNWeb

Any facility that treats a patient who is from outside the U.S. MUST:

- Report the patient in CROWNWeb as “New ESRD Patient”
- Complete a 2728 form with both physician and patient signature
- Discharge the patient using discharge reason “Other” when the patient returns back to their home country

If you are unable to obtain a patient signature, complete the 2728 form as much as possible and “Save” it in CROWNWeb. Email the Data Department at Data@nw18.esrd.net with the patient’s UPI number, facility CCN, and reason why the signature was not obtained. The Data Department will note this information in their tracking database.
