

Summary of MiMedx Services

1. Wound care treatment support information:

a) Treatment

- We provide the support & information if you decide to set-up wound care treatment as part of your clinic.
- This includes support & information on clinical set up, scheduling, supplies, and coding & billing.

b) Referral

- We can provide information on existing advanced wound care treatment facilities in your geography to improve outcomes in patients with chronic lower extremity wounds.
- We have local representation in every geography to help you make the connection that is most efficient & convenient for your patients.
