

Provider Education & Information

The **Medical Advisory Council (MAC) of the Forum of ESRD Networks** (<http://esrdnetworks.org/>) has developed toolkits to assist facilities in meeting the Conditions for Coverage. The toolkits are located [HERE](#).

Resources:

While there may be many individual factors at play, a nurse should be prepared with the skills to assess for abnormalities of the new arteriovenous fistula and ensure successful cannulation. This quick guide will offer the nurse a refresher in physical assessment basics of vascular access maturity.

Determining Fistula Maturity

Webinars:

Please click on the titles below to access the recorded webinars from the corresponding events:
