

# Preventing Security Violations

It is the facility's responsibility to comply with HIPAA regulations and CMS Security Policies for protecting PHI and PII. All security violations are reported to CMS by the Network.

The Network 18 document Preventing Security Violations at Your Facility will:

Educate facility staff on how and why it is important to protect patient information

Staff will learn why e-mailing, mis-sending, and sending unrequested PHI/PII are security violations

Staff will be able to identify HIPAA and CMS security regulations

Ensure all facility staff are accountable

Staff will learn the difference between PHI and PII

Prevent CROWNWeb-related security violations
